EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Zimmerman on 5 January 2010.

The application has been amended as follows:

The following claims have been amended as follows:

Claim 1

On lines 23-25 of Claim 1, "a video overlay processor connected between the system data bus and the media bus, the video overlay processor receiving the deciphered information signals from the media bus and sending the video overlay signals to the system data bus" should be --a video overlay processor connected between the system data bus and the media bus, the video overlay processor superimposing a first audio-video signal over a second audio-video signal to produce a superimposed signal and sending the superimposed signal to the system data bus--.

On lines 26-27 of Claim 1, "the network bus connected to the system data bus and receiving system data bus information and the video overlay signals communicated along the system data bus" should be --the network bus connected to the system data bus and receiving system data bus information and the superimposed signal communicated along the system data bus--.

On lines 28-29 of Claim 1, "a mass storage device connected to the system data bus and storing the system data bus information and the video overlay signals" should be --a mass storage device connected to the system data bus and storing the system data bus information--.

On lines 34-36 of Claim 1, "a data switch connected to the network bus, the data switch receiving the system data bus information and the video overlay signals and sending the system data bus information and the video overlay signals to one or more switch ports" should be --a data switch connected to the network bus, the data switch receiving the system data bus information and the superimposed signal and sending the system data bus information and the superimposed signal to one or more switch ports--.

Claim 5

On line 1 of Claim 5, "The system of claim 5" should be --The system of claim 4--.

2. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose, suggest, or teach claims 1, 17, and 26, in particular the video overlay processor superimposing a first audio-video signal over a second audio-video signal by the video overlay processor to produce a superimposed signal and sending the superimposed signal to the system data bus in combination with other elements recited in the claims.

Prior art, such as Sheppard, discloses a video overlay processor (450 – fig. 5) connected between the system data bus (422 – fig. 5) and the media bus (424 – fig. 5),

the video overlay processor receiving the deciphered information signals from the media bus [424] and sending video overlay signals to the system data bus [422] (¶ 0069-0071).

Other prior art, such as Hirota, discloses a video overlay processor (110 – fig. 1) connected between the system data bus and the media bus, the video overlay processor receiving the deciphered information signals from the media bus and sending video overlay signals to the system data bus (Col. 3, lines 40-59).

However, the prior art fails to disclose the video overlay processor superimposing a first audio-video signal over a second audio-video signal by the video overlay processor to produce a superimposed signal and sending the superimposed signal to the system data bus in combination with other elements recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRIS PARRY whose telephone number is (571) 272-8328. The examiner can normally be reached on Monday through Friday, 8:00 AM EST to 4:00 PM EST.
